approx. 10 minutes. Developers are Hackers and Google has created a special place for them. Developer mode is a special environment built into Chrome OS where many of the security restrictions have been removed. This will allow us to install custom software designed by some seriously cool hackers, but it also means that the machines are more vulnerable to security breaches.

In computing, a visual programming language (VPL) is any programming language that lets users create programs by manipulating program elements graphically rather than by specifying them textually. A VPL allows programming with visual expressions, spatial arrangements of text and graphic symbols, used either as elements of syntax or secondary notation. For example, many VPLs (known as dataflow ...
